## Three Universal Needs

Decades of commitment to innovation has lead Sealy to patented technologies that instantly adjust to your body for the all-over support and comfort you need for a relaxing night's sleep.

### Body Alignment

Sealy is designed to support you where you need it most so your ears can line up with your shoulders, hips, knees and ankles for better relaxation.

### Pressure Relief

Uncomfortable pressure points feel like pins and needles so you shift positions to release the pressure. Our mattresses focus on providing more pressure relief to bring you more comfort.

### Motion Reduction

Nobody wants to disturb someone else when getting in and out of bed. Sealy is committed to improving motion reduction for a better night's sleep.

Proud supporter of you

### Foams you can feel good about

The CertiPUR-US seal of approval is like a health checkup for foam. You can be confident that the standards for content, emissions, and durability has been analyzed by independent, accredited testing laboratories.

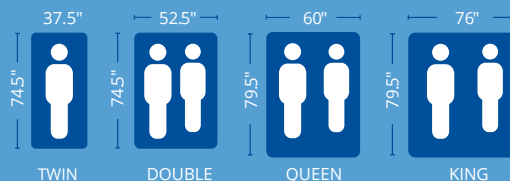

CertiPUR-US certified foam is:

- Made without phthalates regulated by the Consumer Product Safety Commission
- Made without ozone depleters, formaldehyde, mercury, lead, and other heavy metals
- Made without PBDEs, TDCPP or TCEP ("Tris") flame retardants
- Low VOC emissions for indoor air quality

### Size Matters

Queens and kings allow more space for a deeper more comfortable sleep. Although a queen size mattress has 21% more sleeping space than a double, did you know that its width is the same as putting two crib mattresses together?

Consider upgrading to a king size mattress and give yourself the royal treatment with 27% more space than a queen!

### Canada's #1 Mattress Supplier

Choose Sealy, and you choose over a century of mattress ingenuity and expertise. And with quality that's made to last, you'll rest easy for many years to come.

### The little things make the difference

That's why Sealy uses durable, high density CertiPUR-US® to ensure maximum support and long-lasting comfort.

We work closely with industry experts to continue our long legacy of providing quality mattresses suited for every owners budget.

### Support doesn't stop at the mattress

When purchasing a new mattress it's important to ensure it's properly supported with the right foundation.

Our regular profile boxspring, measuring 9" tall, is a fantastic solution for lower bed-frames and mattresses making it easier to get in and out of bed.

Our low-profile boxspring, measuring 5.25" tall, works well with a loftier mattress and/or bed-frame.
